

DT:**To design, make, evaluate and improve**

Design your own recipe for a super food smoothie by researching and creating planning boards

To design, make, evaluate and improve**What food flies?**

Follow simple recipes using food that is imported from around the world

Follow the different seasonal products we grow from the farm to fork.

To master practical skills:

To cut and prepare food hygienically

To use tools safely and accurately

To create and make recipes for a class recipe book

What does it take to be a chef?

To create, plan and evaluate our own super smoothies/ soups

The Big questions...

English

Whole School Book - A Child of Books

Fairytales, folk stories and traditional tales

Instructions: Revolting Recipes

Explanations: How is fairtrade tea farmed?

How does the dragon-catching machine work? - The Boy Who Grew Dragons

Performance Poetry- Chocolate Cake

Geography: Why is trade important?

I know how to locate the UK and other countries including European ones such as Germany, Ukraine, Spain, Portugal

I know that import means bring in and export means send out

I know what exported and imported means

I know where some foods originate and can identify on a map

I know that seasonal produce is grown on farms in the UK

I know some ways food travels around the world

I know that food miles tell you how far produce has travelled

I know that food miles impact the environment and quality of the produce

I know what the different food labels mean and why they are important

I know that Fairtrade ensures farmers around the world get a fair pay
